**面积：**

30,000 平方英尺

**主要顾问：**

Skidmore, Owings & Merrill

**Description**

This urban plaza was designed as a noon-time pocket park. Seating is designed into the raised planters, strengthening the plaza's geometry while providing inviting space to users.

The plaza is built over the high-rise's parking garage, yet the paving is flush with the City sidewalks. A vine trellis runs the length of the plaza, softening the neighboring building wall, and a fountain is on axis with the building lobby.

This plaza also connects to a series of three other mid-block parks and pedestrian corridors.

**描述**

这个都市的广场的设计为中午休息的广场。为突出花坛的座位是按照几何图形设计而成。有邀请行人进入广场的效果。此广场建于停车场阳台上面，铺设与周边人行道对齐。一座藤架与喷泉立于楼前室中轴线。此广场还连接其它三个公园和行人走廊。
