**Prime Consultant**

Y.H. Lee Associates,  
Architects

**Description**

The Government of China commissioned Y.H. Lee & Associates to design two summer villas on the shore line beaches of Hainan Dao. The concept was to combine two up-scale homes into one villa complex. Each villa had its own swimming pool courtyard with each individual home sharing the central courtyard.

These villas were to be used by government leaders for summer vacations with their families. Each home had individual private spa and gardens. The swimming pool terraces look out to the beach and paths connected both complexes to the beach environment. Extensive garden walks & patios gave each villa its own privacy.
