\$300,000 –  
Total  
landscape

**Area**  
15,000 square feet

**Prime Consultant**  
Rosenberg McGinnis,  
AIA Inc.

**Description**

The roof garden offers flexibility from individual use to group oriented events for UC Berkeley students who live in the adjacent three story apartment complex. Raised planters have a number of features, including built-in lights for garden use in the evenings, automatic irrigation and complete drainage system allowing for easier maintenance. The triangular scoring paving pattern with alternating sandblast finishes creates texture and interest in the garden.
