Description

As one of the largest comprehensive care facilities in Northern California, Rancho San Antonio offers three levels of care to the elderly: townhouse units for independent seniors, residential care for those less mobile, and skilled nursing facilities for those in need of assistance.

The recreation center offers a number of places for residents to socialize and enjoy the outdoors, including a classically-styled swimming pool, an adjoining club house, patio areas with tables, chairs, and umbrellas, pergolas covered with vines, and a window wall lined with Italian cypresses.
