Nugget Best Senior
Housing Project

Description

As one of the largest comprehensive care facilities in Northern California, Rancho San Antonio offers three levels of care to the elderly: townhouse units for independent seniors, residential care for those less mobile, and skilled nursing facilities for those in need of assistance.

The landscaped areas provide a variety of outdoor settings for its residents, including Italian, Asian, native, and classical gardens. Using drought-resistant plants and sycamores as street integrate the overall landscape plan. The Italian garden above uses formal yet strong axial designs with Italian Cypress trees, boxwoods, and terra cotta planters to create elegant and comfortable outdoor spaces.
