

AlmaVia of San Francisco San Francisco, CA

Schematic Design / Construction Documents & Construction Administration

An assisted living facility for older, frail adults, including individuals with Alzheimer's and related disorders. The two and three story structure has plentiful access to outdoor gardens. The concept of the landscape design is to develop small courtyards providing various spaces support gatherings of friends and family and social events. Walking paths among distinct garden areas such as a bamboo garden, a knot garden, a purple flowering garden, and a fern garden, encourages residents to spend time outdoor.
